Classification Communiqué n°5

Chief Classifier Communique

- Classification panel has been receiving numerous concerns about Mathieu Bosredon's classification.
- He was classified in 2010 under a different set of handcycle classification rules and submitted a medical review request in the beginning of 2024 which, according to medical documentation presented, was accepted by the UCI classification Committee.
- Following the procedure, he was then seen by classifiers at the first opportunity here in Ostend. A thorough examination was performed and witnessed by the UCI Para-cycling Manager, Todd Fraser.

The final result was evident, and according to article 16.5.005.3 of the UCI Regulations, this athlete meets the conditions of the H3 sports class based upon degree of impaired muscle power.

As all classification decisions rest with classifiers appointed by UCI we remind all nations that any abusive actions will not be accepted.

Kevin Kopera
